Sent: 11/25/2020 7:40:03 PM
To: **Ex. 6 Personal Privacy (PP)**
Subject: Undeliverable: EPA issued final Underground Injection Control permits for the Dewey-Burdock uranium site: weblink to EPA documents
Attachments: EPA issued final Underground Injection Control permits for the Dewey-Burdock uranium site: weblink to EPA documents

Your message did not reach some or all of the intended recipients.

Subject:EPA issued final Underground Injection Control permits for the Dewey-Burdock uranium site: weblink to EPA documents

Sent:11/25/2020 7:40:04 PM

The following recipient(s) cannot be reached:

Ex. 6 Personal Privacy (PP)

on 11/25/2020 7:40:04 PM

Diagnostic code = NoDiagnostic; Reason code = TransferFailed; Status code = 500Diagnostic code = OrNameUnrecognized; Reason code = TransferFailed; Status code = 510

<smtp-20.iol.local #5.0.350 smtp;550 5.0.350 Remote server returned an error -> 550

Ex. 6 Personal Privacy (PP) User quota exceeded><smtp-20.iol.local #5.1.351 smtp;550 5.1.351 Remote server returned unknown recipient or mailbox unavailable -> 550 Invalid Recipient

Ex. 6 Personal Privacy (PP) [smtp-20.iol.local; LIB_520]>

smtp-20.iol.local rejected your message to the following email addresses:

Ex. 6 Personal Privacy (PP)

Your message couldn't be delivered. When Office 365 tried to send the message, the external email server returned the error below. This is probably due to a problem or policy setting on the recipient's email system.

Check the error for information about the problem. The error might tell you what went wrong and how to fix it. For example, if it says the message was blocked due to a potential virus, try sending the message again without attachments.

For Email Admins

This error was reported by an email server outside Office 365, and if the sender is unable to fix the problem by modifying their message then it's likely that it's a problem that only the recipient's email admin can fix.

1. **Check the error for information about the problem.** The error might tell you what went wrong and provide clues for how to fix it. For example, if it says the message was rejected due a Sender Policy Framework (SPF) issue then you'll have to work with your domain registrar to properly configure your SPF record.
2. **Check the error for information about where the problem is happening.** For example, look for a domain name like contoso.com. This tells you which organization was responsible for the error. The recipient's email server could be causing the problem, or it could be due to a third-party service that your organization or the recipient's organization is using to process or filter email messages.

3. **If you can't fix the problem, contact the responsible party's email admin.** This could be the recipient's email admin, your smart host service admin, or someone similar. Provide them with the error code and error message from this non-delivery report (NDR) to help them troubleshoot the issue.

Unfortunately, Office 365 support is unlikely to be able to help with these kinds of externally reported errors.

smtp-20.iol.local gave this error:

Remote server returned an error -> 550 <sadaqat.balsamo@libero.it> User quota exceeded

Ex. 6 Personal Privacy (PP)

Your message couldn't be delivered. It appears that the email address you sent your message to wasn't found at the destination domain, or the recipient's mailbox is unavailable. The email address might be misspelled or it might not exist. Try to fix the problem by doing one or more of the following:

- **Send the message again.** Before you do, delete and retype the complete address. If your email program automatically suggests an address to use don't select it.
- **Clear the recipient Auto-Complete List entry** in your email program by following the steps in [this article](#). Then resend the message, but before you do, delete and retype the complete address. If your email program suggests an address to use don't select it.
- **Contact the recipient by some other means** (by phone, for example) to confirm you're using the right address. Ask them if they've set up an email forwarding rule that could be forwarding your message to an incorrect address.

If you're still unable to fix the problem, ask the recipient to tell their email admin about the problem, and give them the server that reported the error below.

For Email Admins

When Office 365 tried to send the message, the external email server returned the error below. This error was reported by an email server outside Office 365, and if the sender is unable to fix the problem by correcting the recipient's email address or clearing the Auto-Complete List entry, then it's likely a problem that only the recipient's email admin can fix.

- **Check the error for information about where the problem is happening.** For example, look for a domain name. The domain name will tell you which organization was responsible for the error. The recipient's email server could be causing the problem, or it could be due to a third-party service that your organization or the recipient's organization is using to process or filter email messages.
- **If you can't fix the problem, contact the responsible party's email admin.** This could be the recipient's email admin, your smart host service admin, or someone similar. Give them the error and the name of the server that reported the error to help them troubleshoot the issue.

Unfortunately, Office 365 support is unlikely to be able to help with these kinds of externally reported errors.

smtp-20.iol.local gave this error:

Remote server returned unknown recipient or mailbox unavailable -> 550 Invalid Recipient
